SIGHTLINE ASSURE™ 2.0

BETTER. FASTER. STRONGER.
SIMPLY POWERFUL IT PERFORMANCE MONITORING

GET REAL-TIME ANALYTICS LIGHTNING FAST

Assure is a simple, yet powerful IT peformance monitoring solution purpose-built to continuously maintain the health and availability of mission-critical servers and software applications.

Assure is designed to provide you with a single, unified view of the status of hardware, operating systems, and software applications needed to keep your systems up and running at all times. Monitor multiple servers, access control servers, applications, storage devices, network devices, peripherals such as cameras and door locks and more all in real-time from one comprehensive dashboard. Assure users can easily predict performance issues and prevent unplanned downtime and data loss.

Several industries including manufacturing, healthcare, transportation, and security are successfully utilizing Assure to monitor their entire stack. Now you can benefit from this easy-to-use application to provide insight without the complexity of traditional IT-industry software. Designed to be simple on the surface, Assure is built upon Sightline's powerful Enterprise Data Manager (EDM) analytics engine, which collects and analyzes hundreds of real-time system metrics to optimize performance.

SIGHTLINE SYSTEMS

ENSURE MISSION-CRITICAL INDUSTRIAL IT SYSTEMS ARE CONTINUOUSLY AVAILABLE
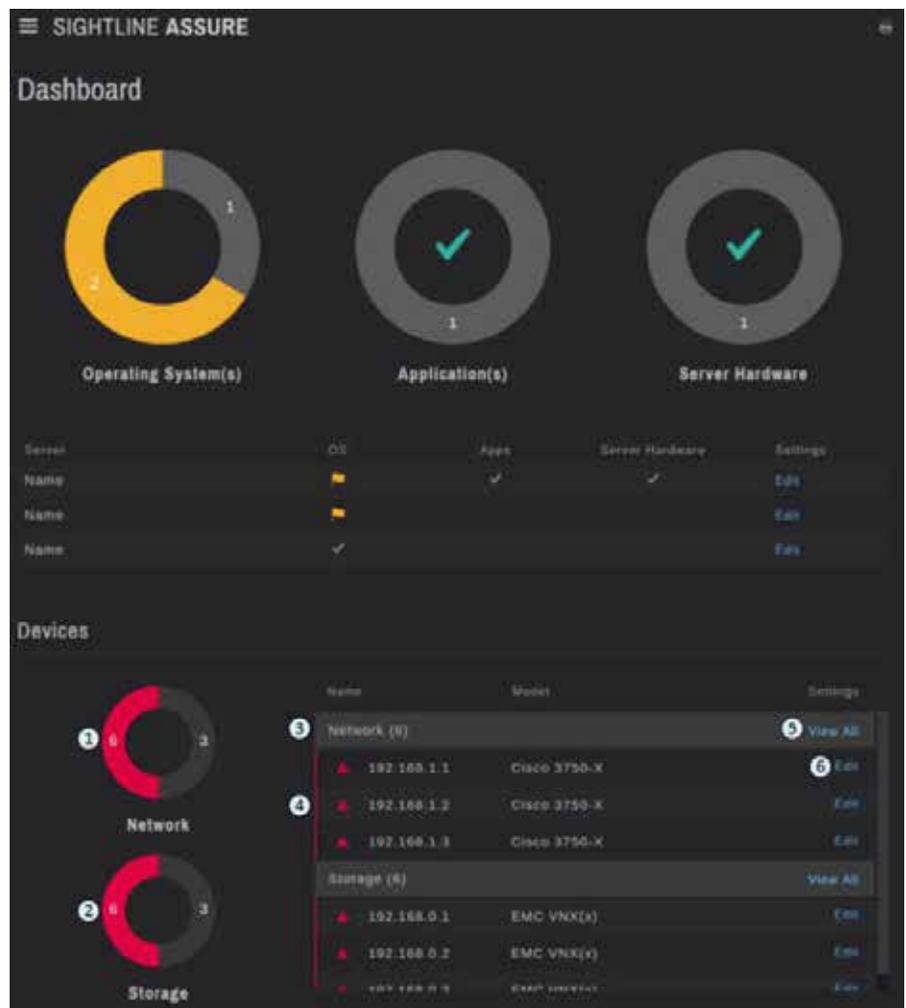

POWERFUL MONITORING ENGINE

Keep your fingers on the pulse of your entire system. Continuously monitor the health and availability of one or many servers and maximize uptime for the OS and software applications. Assure monitors physical and virtual system resources and performs hundreds of ongoing CPU, disk space, memory, and network usage checks. Users receive early warning reports of capacity issues, degraded application performance, and critical systems errors. Users can also visualize, drill-down, and correlate data across multiple servers, with support for Windows and Linux operating systems, VMware servers, and guests.

STREAMLINED VIEWING

The Assure dashboard allows you to identify system performance issues ahead of time and take immediate action to prevent downtime. All active operating system, application, and hardware alerts are aggregated from one or more servers and are displayed on a dashboard in real time. Color-coding makes it easy to see exactly where the problem exists: Gray (good), Yellow (warning), and Red (critical).

PROACTIVE DETECTION AND NOTIFICATION

Assure allows users to customize individual alert thresholds when resources reach a maximum or minimum level. You can even configure email notifications when performance issues require immediate action.

PRODUCT OVERVIEW

FEATURES

SUPPORT
for VMware, Windows, Linux, OpenVMS, everRun, and KVM operating systems and platforms

STATUS UPDATES
available through OPC server capability

COMPATIBLE
with all modern web browsers and mobile devices

SINGLE, UNIFIED, EASY-TO-USE DASHBOARDS
with drill-down details

DAILY OR WEEKLY REPORTS
automatically sent via email

CUSTOMIZE ALERT NOTIFICATIONS
and alert history views

MONITORS
servers, applications, storage devices, network devices, peripherals (such as cameras and door locks), and more

BENEFITS

CONTINUOUSLY MONITOR
the health and availability of one or many servers from a single dashboard

MAXIMIZE UPTIME
for the OS and software applications running in physical or virtual IT infrastructure

ACCESS
a single-pane-of-glass view of your mission-critical industrial IT infrastructure

DETECT SYSTEM PERFORMANCE ISSUES
ahead of time and respond before downtime occurs

CONTINUOUSLY MONITOR
system resources and automatically restart unavailable applications

CUSTOMIZE ALERT THRESHOLDS
to provide real-time email notifications of potential issues

THE ASSURE DIFFERENCE

The Sightline Assure platform is the only one designed to provide accurate insight to your entire company from the IT department through to the C-Suite. Easily understandable reports and dashboards help you maintain constant availability and enable you to easily provide critical informatino to other decision-makers.

LEARN MORE

Today, many Fortune 500 and Global 2000 companies in energy, finance, manufacturing, retail, telecommunications and travel industries as well as many government agencies rely on Assure to proactively gauge performance and prevent costly downtime.

Join the tens of thousands of servers currently being monitored by Sightline Systems. Visit www.sightline.com or contact us today at sales@sightlinesystems.com and (703) 563-3000 to learn more about how Assure can help you monitor systems, analyze trends, and make your business operations better, faster, and stronger.
